

PEKA-Fix 2218

Art.-Nr.: 135889

Description:

This double-sided tape consists of a paper tissue carrier, layered on both sides with a modified dispersion acrylate adhesive. This powerful adhesive is highly resistant against aging and plasticisers. It is lined with a double-sided silicone paper.

Area of use:

This tape is especially suitable for the adhesion of cellular rubber, open-pore and impregnated foams as well as felt fabrics and other rough, open surfaces. Due to the chemical characteristics of EPDM cellular rubber, suitability and durability is to be tested in individual cases, before application.
